It is certain that New York men are too alive to the necessity of some system of real rapid transit to be put off. If they do not get what is needed they will not rest ent until they do. The responsibility of providing them with a means of age to remote points for which will not feel that they are paying the price of some unworthy reaction must rest on the Commissioners and on the at Albany. Senator Ives should see that the objectionable Gould clause in the bill is excised, in which cas: the bill could pass to the satisfaction of those for whom this relief is intended. Take that clause out and push the bill through.

FREE LECTURES.

The course of Free Lectures for working people which THE EVENING WORLD Secured have proven a great success. The attendance this year showed a notable increas over that at the preceding lectures. They evidently appeal to the people who are not slow to show their appreciation of such in gructive and recreative discourses.

The accommodations afforded for those who attend these lectures are not what they should be. DRAMATIC BUICIDE.

Disgust of life is often due to an overestimate by the individual of his own imrivet the attention of their fellow-men by some untoward method of shuffling off this mortal coil.

But undoubtedly disgust, despair and madness have much to do with such cases. A man who had injured himself by leaping from the Goat Island Bridge to the ice below, dragged his orippled form to the chilly swirl of water and flung himself in, to be swept ruthlessly over the brink. He had been drinking heavily before this mad deed.

Among these are the fellows out on a lark who have acquired pretty reasonable jags. They've got more money than they know what to do with, or at least think they have, which is all the same for my business. They give up liberally—a half or a dollar, and generally a round or two of drunks thrown in for good measure. If I didn't get their money the barkeepers on them often.
